Related Technology Datasheet

### For industry

### For research organisation

### For Others

(Food) physics  
(Food) biology  
(Food) chemistry  
Biotechnology

Related Facility Datasheet

### Technology

Safety and health production process

Biotechnology applied to biosensors

### Application field

packaging

Quality assurance

### Equipment available

Biotechnology applied to food production

### Name

### Function

### E-Mail

### Expertise

|                   |                 |             |   |
|-------------------|-----------------|-------------|---|
| Bruno De Lucas    | Researcher      | Send E-Mail | Research and development activities related to development of food products |
| Juan Díaz         | General manager | Send E-Mail | Research and development activities   |
| Mayte Villastrigo | Coordinator     | Send E-Mail | Research and development activities related to health and safe production   |
| Natalia Prado     | Researcher      | Send E-Mail | Research and development activities related to food microbiology            |
| Pelayo Gonzalez   | Researcher      | Send E-Mail | Research and development activities related to biochemistry technology      |
| Sergio Serrano    | Researcher      | Send E-Mail | Research and development activities related to development of food products |
