

*This User Manual has been created to help you get started easily. We have created information points  at several locations on the website.*

This website is about innovations in **food processing**, and comprises 227 methods and technologies, 826 profiles of companies and institutes active in the field of food processing and an overview of technical and supporting infrastructure available (111) in Europe and worldwide. The results to be found with this search application are **high quality information pages, created by experts** of novel food technologies, both from industry and academia.
