Related Technology Datasheet

For industry

Process development
Machineries

For research organisation

For Others

For industry: RF sterilization of viscous liquids and solid/liquid mixtures; RF drying and disinfestation of agricultural commodities; RF pasteurisation of packaged food; RF defrosting of fish/meat/vegetables; MW vacuum drying

For research organisation: semi-industrial and lab-scale equipment; process development for thermal and drying processing

Related Facility Datasheet

Technology

Radio Frequency at 27.12 MHz

Radio Frequency at 27.12 MHz

Application field

Rapid tempering & defrosting of meat, fish, vegetables, etc.

Post-baking drying of bakery products (biscuits, crackers, etc.)

Equipment available

From 3 kW to 105 kW, batch or tunnel (modular)

From 10 kW to 85 kW, tunnel (modular)

Radio Frequency at 27.12 MHz or MW at 2450 MHz	Pasteurisation of packaged food products	From 10 kW to 85 kW, tunnel (modular)
Radio Frequency at 27.12 MHz	Pasteurisation or sterilisation of liquids in tube	From 10 kW to 105 kW, tubular system
Radio Frequency at 27.12 MHz	Baking of white-crust bread	From 10 kW to 85 kW, tunnel (modular)
Radio Frequency at 27.12 MHz or MW at 2450 MHz	Disinfestation and sanitisation of dry food commodities	From 10 kW to 105 kW, batch, tube or tunnel (modular)

Name	Function	E-Mail	Expertise
Enrico Zanetti	CEO	Send E-Mail	
Meggiolaro	Sales Area Manager	Send E-Mail	Pest control, pasteurisation and sterilisation
Nicoletti	Sales Area Manager	Send E-Mail	Tempering and defrosting
Scotton	Sales Manager	Send E-Mail	Bakery
